

Electronics Assembler (Hand Solder)

We are a successful South Eastern based electronics manufacturing company which requires an experienced Electronics Assembler to join our Production team.

The principle responsibilities for this role are:

- Hand soldering, solder touch-up and rework of a wide variety of thru-hole and SMT electronic assemblies in a quick turn environment.
- Perform all responsibilities in areas of PCB assembly, preparing for solder, rework and inspection of boards.
- In-process inspection and solder touch-up of assemblies after reflow, solder touch-up of solder defects as identified by final inspection.
- Visually inspect parts for quality prior and after assembly
- Read and interpret assembly drawings
- Read and apply documented quality system procedures

The successful candidates must entail:

- Extensive experience in hand soldering of through-hole and SMT components
- Ability to use small hand tools, microscope and basic measurement skills
- Ability to follow instructions for engineering modifications
- Knowledge of IPC standards
- Good communication skills, able to speak, read, write and understand English
- Strong attention to details and highly organized
- Ability to work well in a fast paced environment

If you believe you are the perfect candidate for this position, please email your cover letter and CV (.pdf or .doc format only) through to careers@coolon.com.au with subject title as 2011 Electronics Assembler.
